Any information which you may need that is not found in this catalog may be had by contacting us at Manchester, Conn. If you desire, we will have our representative in your area contact you and discuss your needs.

Wrapped Nursery Stock

This catalog provides information concerning bare-root material only. However, C. R. Burr & Company is one of the oldest nurseries attractively root-wrapping Roses, Flowering Shrubs, Ornamentals and many other types of plants. We are one of the largest growers in the East, providing a wide line of wrapped material in various price groups so that the retail nurseryman and dealer can present a well-balanced offering to the trade. All plants are packaged in Peat Moss, which our experience has indicated is the best moisture-retaining agent for keeping the root system healthy.

Information as to the type of packages, prices and varieties wrapped may be had by writing our Manchester office.

"Growing Since '98"

"Here is a portion of the 200,000 softwood cuttings we root each Summer in our Greenhouses."

The C. R. BURR & COMPANY has been a "Growing" business for over half a century. The greater part of our 600 acres are located in the heart of the fertile Connecticut Valley, celebrated for the fertility of its soil and its bumper crops of many agricultural products.

We grow a complete line of nursery stock, including Evergreens, Fruit Trees, Roses, Shade Trees, Vines and specialize in Flowering and Ornamental Shrubs. In spite of considerable dryness, our stock has matured in an exceptional way and we have a better than normal inventory of the larger sizes of heavy rooted, well branched shrubs for landscape use. You will find that when these plants are cut back and planted, they will produce an immediate effect. The list of varieties available is, we believe, an extensive one, including all the tried and true varieties as well as the choicer one, such as, *Cornus Elegantissima*, *Deutzia Gracilis*, *Kolkwitzia*, *Prunus Glandulosa*, French Hybrid Lilacs, *Viburnum Carlesi*, *Weigela Variegata*, and others.

We take special pride in the Flowering Crabs we have to offer this year. Averaging 5 to 6 feet in height and moderately priced, they will not be surpassed in terms of satisfaction by any ornamental. Covered with bloom in the spring, they will also display interesting color effects late summer and fall with their fruit and colored foliage.

Our prices are competitive and as low as consistent with the shipment of top quality nursery stock. We believe that prices will remain firm since it appears that ornamentals are still in heavy demand while the supply, although good, is not in surplus. The construction of new homes still continues at a good rate, which is a pretty good barometer of the sales outlook for the coming year.

We are always glad to show visiting nurserymen around our farms and through our warehouses, and hope that as many of you as possible will find an opportunity to visit us. Our Main Office is nine miles East of Hartford, Conn., near Routes 6, 15 and 44. We will meet you at Hartford, or Springfield, Mass., if you notify us when and where you will arrive.

Members of American Association of Nurserymen, New England Nurserymen's Association, and Connecticut Nurserymen's Association.

**All stock graded according to American Association of Nurserymen's standards.
Terms and Conditions of Sale:**

These prices are wholesale and apply only to wholesale quantities. They are based on present market conditions and subject to change without notice.

We Do Not Break Bundles. All orders must be made up in 10 of a variety or multiples of 10 except Evergreens and Ornamental Trees.

Shipping. We welcome customers' instructions regarding shipping. **In the absence of definite instructions we will use our own judgment, with the distinct understanding that it is without responsibility on our part.** A charge will be made for boxing and crating except when cash accompanies order. Boxing and crating charges will be made for all evergreen and shade trees.

Claims for shortages, unsatisfactory stock or for any cause whatsoever must be made in writing direct to the home office within ten days from receipt of shipment.

Correspondents are requested to use their business letterhead to identify them as being entitled to wholesale prices. We do not quote prices to retail buyers.

Guarantee:

All stock is guaranteed to be true to name, and we will replace or refund the purchase price of any item which is proved not to be the variety listed herein. We will not in any case be liable for a sum greater than the amount originally paid for the item purchased.

Quantity Purchases:

Purchases of 30 or more of one item entitle the purchaser to the 100 rate. Purchases of 300 or more of one item are subject to the 1000 rate.

*This does not apply to Roses or Evergreens which have special discounts.

We have limited quantities of items other than those listed. Mail your want list to our Manchester office.

If you need urgent handling and quick delivery of your order, we have a direct Western Union wire in our office.

Special Note: We accept all orders subject to crop conditions and on condition that same shall be void should injury befall our stock from hail, fire, frost, error in count or other causes beyond our control. All orders are accepted without liability for non-performance if labor shortages or delay in transportation should prevent us from making delivery.

Flowering Shrubs

Your shrubs from the Burr Nurseries are transplanted, field-grown plants, two and three years old. They are produced in the famed Connecticut Valley, renowned for its production of quality agricultural crops.

We welcome your inspection of these fine shrubs throughout the year, either in the field or in our warehouses. The plants are propagated, transplanted and grown on in well-spaced, fertilized and cultivated rows. They are pruned, dug and graded to assure you of well-branched, heavy-rooted northern-grown ornamentals.

Fruit Trees

Choice northern-grown fruit trees have been one of the featured items at Burr's for many years. As New England's largest fruit-tree growers, we are confident that your requirements will be satisfied here. All trees are grown by the most modern methods and all are graded to the standards of the American Association of Nurserymen.

The inspectors of the Massachusetts Fruit Growers Association offer inspection service for trueness-to-name and are regularly employed to inspect Burr blocks of fruit trees. The certificate issued to C. R. Burr & Co., Inc., as of August 20, 1952, reads as follows:

"All of the apple, pear, plum and sweet cherry varieties propagated and now growing in the nursery of C. R. Burr & Co., Inc., Manchester, Connecticut, have been examined by the Massachusetts Trueness-To-Name Inspection Service. To the best of our knowledge, these trees are true-to-name as they now stand in the nursery row.

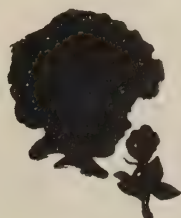

Signed (A. P. French")

Height and Caliper

Height given of fruit trees is approximate and represents average height of most varieties. Some small growing kinds may fall short of height specified as it is intended that the caliper shall govern.

Ornamental Trees

The great increase in new housing has resulted in a very wide-spread demand for ornamental trees. It is our belief that this demand will continue to be strong for several years, and we feel that the ornamentals in our blocks at Ellington will prove profitable for you. They are grown in richly-fertilized soil, spaced in wide rows and pruned to produce a desirable form. We have many varieties available that have been scarce in recent years.

A block of Hick's Yews pictured in Late October. These plants are all at least seven or eight years old and have been topped to promote fullness. Those are not weeds you see between the rows, but oats, which Ralph Fisher, our Growing Superintendent, plants for winter protection and will cultivate under in spring for green manure.

"A block of *Daphne Cneorum* in our Ellington Farm. These plants are grown three years in the field and will have been sheared at least six times before digging and balling. Increasingly popular as a foundation plant."
